MOUNT SAVAGE FIRE BRICKS, Manu VI factured at the Mount Savage Iron Works Maryland. FOWLE & CO., Agents, Alexandria, Virginia.

Lonaconing, Md., August 31st, 1848. I take much pleasure in testifying to the excellence of the "Mt. Savage" Fire Bricks. I have used them with the most satisfactory results for nearly three years, for the lining or inwalls, and used. I have been long familiar with the Stour but if the choice were open to me, I should at all times give the Mt. Savage Fire Brick a decided preference. C. E. DETMOLD. VULCAN WORKS, BALT. 20th Sept. 1848.

We have no hesitation in giving our preference to the Mt. Savage Fire Bricks, over any that we have ever used. In lining our Air Furnaces we have mixed then onger, than any of those with which we have tried them, and we consider them a better Brick than the "Gairnkirk," or any other Fire Brick in

MURRAY & HAZLEHURST. BALTIMORE, September 20th 1848. Having used large quantities of the Mt. Savage Fire Brick, in the con truction and repairing of our Furnaces, it gives me pleasure to say, that sels, with a large assortment of fancy notions, consider them a very superior Brick and profes constantly on hand, and for sale at reasonable them to any other Fire Erick I have seen in our Eastern Cities. D. W. DAVIS, Foreman, Baltimore and Cuba

Smelting and Mining Company Mr. Savage, September 20th 1848. The Mt. Savage Fire Bricks are decidedly the best article of the kind evermade or used in this country, comparing favorably with Rufford's No. 1 Stourbridge Brick, they having been placed side by side with the latter, in the fire-bridges of the large Re heating Furnaces used for rails at the Mt. Savage Iron Works, and have without exception proved more refractory, having retained their shape and size a longer period of time. The roofs of the Puddling and Reheating Furnaces made of these Bricks, invariably stand nearly twice the length of time that they do when built of any other material, and require scarcely any renewal or repairs so long as they stand at all. Perhaps the best and their excellence on all points, is the fact, that in one of the large Blast Furnaces at our works, another branch or a part of the trunk. (14 feet Boshes) the same lining or inwalls, made other respects, and only so slightly worn as to be as suitable for the purposes as new Bricks. These Bricks are made of an indurated Fire Clay so hard as to require much power to grind it.lected, so as to be entirely free from any admixture of sand or common clay, such as is generally used in the manufacture of Fire Bricks; and to

THE TALES OF OLD. The tales of old, that nerved the bold To deeds of love and duty; That woke the sigh or dimmed the eye, Of innocence and beauty;

Who heed them now? The chilling brow And colder heart reprove them; Forget the lays of ancient days, As those who once could love them

Around the hearth, with honest mirth. Our fathers gathered daily; Twas good to see how merrily The moments passed, and gaily! The jester then inspired by cheer,

Would tell his quaintest story; While minstrels came and sung the fame Of those enshrined in glory. Those tales of old were often told By Pilgrim, Monk, or Friar,

Who sung of war in regions far; Where valor might inspire! Of gallant deed, when once achieved, A host could not repel them; For themes like these our sires would please And they alone could tell them.

TO MAKE PEAR TREES BEAR. I was afflicted by the sight in my garden four or five years, of the most luxuriant and thrifty oung pear trees, which would not bear, but all their strength ran to wood. Vexed at this, I resolved to try the effect of bending down the branches so as to check the flow of sap, and cause them to form fruit buds instead of wood buds. Accordingly, the first week in December, 1847, I filled my pockets with stout twine; I drove down some pegs into the ground underneath my trees, which had branched low, so as to make dwarfish head; I then tied a string to the end of every long shoot and gradually bringing down the end of the limb till it curved down so as to make a considerable bend or bow, I fastened it in that position either by tying the other end of the string to the peg or to According to my expectation, the tree next year changed its habit of growth, and set an abundance of fruit buds. Since that, I have had plentiful crops of fruit without any trouble -taking good care not to let many branches

grow on the upright position .- Downings Hor-

Sleeping after dinner is a bad practice. On awaking from such indulgence, there is generally some degree of febrile excitement, in consequence of the latter stages of digestion being hurried on; it is useful only in old people, and in some cases of disease. Sleep becomes wholepointed out by nature; an excess of it produces

ANECDOTE OF A WIDOWER. A ministerial acquaintance of ours, who had lost his wife and had become wearied of his second edition of the single state, was once instructing a congregation from the passage sentially from all others in market. They are Use this world as not abusing it," &c. In the tion some things which a Christian could dispense with in this world. In this category he placed a wife. He had, however, scarcely said, "A man may do without a wife," when his own experience stoutly protested, and he finished his branch of the subject by saying in the simplicity of his heart, "but, my brethren, it's nighty hard."

TOTICE TO CONSUMERS OF GAS.-To iron they furnish a perfect protection IN The Common Council having adopted a against rust, for they contain no metal which, Schedule for the Gas Pipes in this Town, it is desirable to ascertain the number and names of private consumers on the streets, designated therein.

For this purpose, a Book has been prepared, in which those interested are requested to register their names at as early a day as possible. As it is the wish and intention of the Common Council to extend the Pipes, wherever the but common sheet-iron is just as good as tin, consumption of Gas will warrant, parties rewhen thus coated. So, the commonest wood sident on streets not embraced in the Schedule, shingles are by this coating quite equal to the who desire to use it, will please signify such disposition by similar registry. By order of the Committee on Light:

WM. H. FOWLE, Chairman.
